Copies of the listed documents were previously submitted in a prior application, Serial No. 09/432,572, filing date November 12, 1999, upon which applicants rely for the benefits provided in 35 U.S.C. § 120. Applicants respectfully request that the Examiner consider the listed documents and indicate that they were considered by making appropriate notations on the attached form.

The following is a concise statement of relevance of the non-English language documents.

In lieu of a statement of relevance or translation of the Japanese Patent Document No. 07318942, Applicants note that United States Patent No. 5,604,615 to Iwagoe et al. claims priority to this Japanese reference. The submitted United States Patent, therefore, obviates the need for a statement of relevance or translation.

This submission does not represent that a search has been made or that no better art exists and does not constitute an admission that each or all of the listed documents are material or constitute "prior art." If the Examiner applies any of the documents as prior art against any claim in the application and applicants determine that the cited documents do not constitute "prior art" under United States law, applicants reserve the right to present to the office the relevant facts and law regarding the appropriate status of such documents.

Applicants further reserve the right to take appropriate action to establish the patentability of the disclosed invention over the listed documents, should one or more of the documents be applied against the claims of the present application.

If there is any fee due in connection with the filing of this Statement, please charge the fee to our Deposit Account No. 06-0916.

Respectfully submitted,
